DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6598472.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the cited prior art teaches all the basic features of the claimed invention therefore the current application is deemed to be non-distinct with respect to US 6598472.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,14,17,20,21,22 and 25 rejected under 35 U.S.C. 102(b) as being anticipated by Igarashi et al. (US 6070462)

Regarding claims 1,17,21,25 Igarashi et al teaches a detecting element (abstract) for detecting a physical quantity (abstract); a circuit electrically connected to said detecting element (abstract); a housing (abstract) protecting said detecting element in an inside thereof; a conductor (terminal claim 22) electrically connecting said circuit and an outside of said housing (claim 21), wherein said circuit is adjusted (claim 21) by an electrical signal from the outside of said housing through said conductor (claim 21).

Regarding claim 14,20,22 Igarashi et al teaches a terminal 2 connected to said circuit and to a power source to (col. 5 lines 45-
